great

awesome

	pass of time, refinements and iterations	
	→	
review doc	great	<i>awesome</i>
code	great	weird
doc code	meh	useless
test coverage		
test quality		
<u>my</u> . understanding		

	pass of time, refinements and iterations	
	→	
review doc	great	<i>awesome</i>
code	great	weird
doc code	meh	useless
test coverage	ok	maybe ok? >5k lines
test quality	meh	unintelligible a lot of mocks
<u>my</u> . understanding		

	pass of time, refinements and iterations	
	→	
review doc	great	<i>awesome</i>
code	great	weird
doc code	meh	useless
test coverage	ok	maybe ok? >5k lines
test quality	meh	unintelligible a lot of mocks
<u>my</u> . understanding	ok	I have <u>no</u> idea

perhaps,
it's fine?

pass of time, refinements and iterations

review doc	great	awesome
code	great	weird
doc code	meh	useless
test coverage	ok	maybe ok? >5k lines
test quality	meh	unintelligible a lot of mocks
my. understanding	ok	I have <u>no</u> idea

I lost the capability to do
code review and abstraction

I was out of
the loop

perhaps,
it's fine?

nop

I hit a bug with
almost data loss

design docs are
incomplete, they
are not a spec

the AI fills the
gaps without
asking

try to understand

try to guess needed
abstraction

.....

.....

try to understand

try to guess needed
abstraction

.....

refactor A,B,C with X,Y
(~4 lines)

.....

impl code +
fix tests

understand what I want and
how should be made first
left TODOs in the code explaining
it, close where should be resolved

understand what I want and
how should be made first
left TODOs in the code explaining
it, close where should be resolved

resolve the TODOs

impl code, tests
and/or refactor

review code **and** doc
(and change what's needed)

understand what I want and
how should be made first
left TODOs in the code explaining
it, close where should be resolved

resolve the TODOs

impl code, tests
and/or refactor

review code **and** doc
(and change what's needed)

quality: great

Shit goes in -> Shit goes out

Simple prompts/skills -> Code is context

Shit goes in -> Shit goes out

Quality first, quantity later

Simple prompts/skills -> Code is context
